

## RESEARCH ANALYST / SENIOR RESEARCH ANALYST

**Optimal Energy** is a small consulting firm that provides expertise on sustainable energy policy and programs. Optimal conducts research and analysis to support strategic planning and program implementation for energy efficiency program administrators, utilities, commercial and industrial businesses, government, and non-profit organizations.

**This full-time analyst / senior analyst position** supports the work of our consulting staff through guided research and analysis of energy-efficient and renewable energy technologies, programs, and evaluations to support strategic planning and implementation efforts. Project work covers a range of areas including emerging efficiency technologies, distributed energy resources, strategic electrification, active demand response, energy storage, new electricity grid technologies. Other job responsibilities will depend on experience.

### Job Responsibilities

- Research and analyze the benefits, costs, and market conditions of energy-efficient and renewable energy technologies
- Conduct analysis of policies and programs that promote sustainable energy
- Improve data quality and process automation
- Perform economic and potential analyses of sustainable energy resources
- Assist with client deliverables such as written reports, presentations, charts, and figures

### Job Qualifications

- Background and / or degree(s) in economics, energy, computer science, engineering, or related field(s)
- Strong analytical skills with the ability to identify and synthesize information
- Strong spreadsheet, writing, and presentation skills
- Ability to work independently and be proactive about initiating and completing tasks
- Committed to sustainable energy

### What We Offer

- Competitive salary and opportunity for growth
- Competitive salary; generous retirement plan & paid time off; tuition reimbursement; health insurance with low participant premium; employer paid dental, disability, and life insurance
- Generous retirement plan
- High-quality work environment that conforms to the sustainability principles we espouse
- A growing, close-knit team of environmental analysts and consultants
